

CEO's LETTER, July 1, 2008

Dear Shareholders:

Our Business Plan continues progressing very productively. Although developing the business is taking more time than anticipated, mainly due to being under-financed, we are working diligently to find the most efficient and quickest ways to increase revenues for the Company, thus increasing profits and value to our shareholders' holdings. Having an adequately funded company, one can execute your business plan much more effectively and profitably. However, we are confident that we can continue our plan successfully, although to a more limited degree than hoped for.

Our July update:

Fruit2Go –

Final Packaging has been delayed waiting for the Certified Laboratory Analysis Certificate for the necessary Nutritionals Report. The Graphic Design has been approved and we will be presenting the product to the Public very soon. It is important to remember that we will be the only Company in the U.S selling this type of product. We look forward to Fruit2Go revenues being very satisfactory. Please open link below for our new packaging, minus updated Nutritionals:

http://www.crossac.com/the_down_spot.html

Waterless Wash & Wax –

Our Technical Staff has completed the product development to our satisfaction, and we are in the process of seeking appropriate labeling. Initially, we planned to use a Litho type label, but very large quantities were required for ordering. Due to our financial constraints, we will have to use a printed label. We cannot delay any longer; it is time to launch Waterless Wash & Wax. We have begun the label printing process.

Tres Gourmet Pasta –

We have begun presentations of this pasta line from Germany (where it enjoys great success). This is a unique product, an all-natural pressed pasta. We are receiving excellent responses from some of the top supermarket chains and Club stores throughout the United States. Very encouraging!

New Line of Specialty “High-end” Personal Skin Care Products –

We have just begun production on our new website: www.rejuvbeauty.com. We are negotiating with a TV Production Company and Media Company. We have three excellent products ready to launch, with testing and evaluation completed. We will be utilizing Direct Response

Marketing instead of selling thru Mass Market Merchandisers. We are confident that with the product lines we have, we will successfully and quickly reach the consumer directly. At this time, we have no desire to compete with the major Cosmetic Companies for shelf space. We are very excited about the launch. Our very competent Technical staff of Cosmetic Chemists is already developing new skin care products for next year.

All this is being accomplished with limited funding. We anticipate once we get our products launched and sold, we will be able to obtain very favorable financing to enable us to reach the next level in our Business Plan.

CXAC has progressed satisfactorily since one year ago. We are trying to be as efficient as possible while continuing our efforts to increase sales and profits. We are out there in the marketplace developing and presenting our products and creating opportunities for growth in all aspects.

I can assure you, CXAC will be a very successful Company for the benefit to all... the shareholders, the company itself, and the consumer.

Sincerely,

Jorge Bravo

CEO/President
